

Did you know that redder doesn't mean better?

Salmon gets its color from its diet; this, however, does not define their quality. Norwegian Salmon feeds on a nutritious diet in the form of specially formulated, non-GMO dried pellets that contain all of the nutrients needed for a healthy growth: proteins, carbohydrates, vitamins, minerals and antioxidants.

Healthy goodness in every bite

Norwegian Salmon is full of nutrients, including **omega-3 fatty acids** and **vitamins A, D and B12** that are good for your brain development, eyes, heart, skin, and many more. Eat more Norwegian Salmon for a healthier lifestyle!
